## SUMMARY

Passionate and solutions-driven full-stack web developer who recently completed Vanderbilt University's Coding Bootcamp. Strong foundation in various programming languages and an insatiable appetite for learning and growth. Determined and committed to excellence. A quick learner who thrives in fast-paced team environments and is committed to delivering high-quality projects on time.

Let's build the web experiences of tomorrow together!

## SKILLS

HTML | CSS/SCSS | Javascript | MERN

MongoDB | Express.js | React | Node.js

Mongoose | MySQL | Apollo GraphQL | REST API

CRUD | JSON | Algorithms | Wireframing

Git | Github | Scrum and Agile Methodologies | Kanban

## PROJECTS

### Anime Senpai

[Source Code](#) | [Live Website](#)

- ❖ A web application that allows users to sign in and save different anime series to their watchlist. Created within a 4 person team.
- ❖ I worked on almost every aspect, but I feel that I helped my team the most with connecting the backend to the frontend. This project gave me such a better understanding of React and the complexities behind full stack development.
- ❖ MongoDB | Express | React | Node.js | GraphQL

*Projects continued on the next page...*

## WORK EXPERIENCE

### J. Alexander's

Nashville, TN

Jan 2022 - July 2022

Server / Trainer

### Porch and Parlor

Memphis, TN

Nov 2019 - Dec 2021

Server / Trainer / Bartender

### Babalu Tacos and Tapas

Memphis, TN

June 2018 - Nov 2019

Server / Trainer / Bartender

### Purple Parrot Co.

Hattiesburg, MS

May 2016 - Aug 2017

Server / Trainer / Bartender

## TRANSFERABLE SKILLS

- ❖ Creative Problem Solving
- ❖ Multitasking
- ❖ Interpersonal Skills
- ❖ Crisis Management
- ❖ Attention to Detail
- ❖ Empathy & Respect
- ❖ Customer Service
- ❖ Teamwork & Community
- ❖ Sales
- ❖ Leadership

## **The Port Resort**

[Source Code](#) | [Live Website](#)

- ❖ A site where users can seamlessly create their own portfolio website for future employers and personal use. Created within a 4 person group.
- ❖ I contributed to both the frontend and backend, however, it was my sole responsibility to create the generated portfolio. I really got to utilize my creativity with this project and further enhance my CSS skills. This was also my first time using a Javascript framework and was a great stepping stone for later learning React.
- ❖ MySQL | Sequelize | Express | Handlebars | Node.js

## **Real Time Weather**

[Source Code](#) | [Live Website](#)

- ❖ A real-time weather application using the Open Weather API.
- ❖ While this project was to practice using third-party APIs, I learned so much about CSS and creating a beautiful UI. I was able to dive deep into the design of the site, which has now increased my understanding and speed when faced with frontend style issues.
- ❖ HTML | CSS | Javascript

## **EDUCATION**

**Vanderbilt University**  
**Coding Bootcamp**  
Nashville, TN  
*Program Certificate*

**Rhodes College**  
Memphis, TN  
*B.A. Music*

## **INTERESTS**

Video games

Manga/Manhwa

Drawing/Digital Art
